

Eva VANDENBROUCKE

Life experience

From my first job in a restaurant kitchen to administrative assignments, customer service, data processing, organizational management and team coordination. From care and hospitality to insurance expertise and running a coffeehouse. At every step I brought structure, eagerness to learn, and commitment, and I never left behind loose ends. My path has taken many turns, yet always with a stable foundation: reliable, punctual, present, and secure. With strong analytical ability and diligence, I find thoughtful and creative solutions to problems. A career rich in experience and hard work, with that as the common thread, across both white-collar and blue-collar roles.

Education

2025 – Enterprise **Java Developer**

+ frameworks, database, frontend, version control, testing, methodologies, modeling
